

p36 is a certified atrify Partner!

We are excited to announce that p36 passed successfully the atrify certification process and is now a certified atrify partner. p36 enables trading partners, such as medical device (MedTech) companies to send data through a direct connection from the p36 UDI Platform to atrify's GDSN-certified data pool solution. The constant extension of our partner Network provides our customer base a set of various services of our experienced partners. With this holistic, end-to-end connection, p36 can share their UDI-related medical device master data with trading partners and regulators through atrify. There is a strong focus on accuracy, quality and security of UDI data and compliance with regulations and guidelines.

About p36

p36 is SAP Cloud Consulting Partner and supports customers in building their hybrid SAP IT landscape. Through its SAP cloud-based solutions for the life sciences industry, p36 enables medtech companies to meet the requirements of various regulatory authorities and thus achieve global compliance in the area of UDI.
